

Metamorphism and Tectonics of Eastern and Central North America (Igc Field Trip Series, Vol 3)

This volume is one of three volumes of field guides from the 28th International Geological Conference held in summer of 1989. The volumes combine trips with similar geography and geology. Within these subjects are grouped thematically to various geological topics. Volume 3 includes: Southern Appalachian Windows; Tectonics of the Blue Ridge and Piedmont; Geological Cross-Section through Part of the Southern Appalachian Orogen; Jurassic Igneous Rocks of the Culpeper Basin; Metamorphic Rocks of the Potomac Terrane; Metabasalts and Related Rocks of the Blue Ridge Province; Petrology and Structure of Gneiss Anticlines near Baltimore; Stratigraphy and Structure across the Blue Ridge and Inner Piedmont; and Structural Transect of the Central Appalachian Fold-and-Thrust Belt.

Continental tectonics, with a special emphasis on the relationship Hodges p/3 .. East-Central California Guidebook, Geological Society of America, Boulder, Snow, G.J. Axen, B.C. Burchfiel, K.V. Hodges, J.D. Walker, and P.L. Guth, IGC. Field Trip T138: Extensional Tectonics in the Basin and Range Metamorphism and Tectonics of Eastern and Central North America, Volume 3. Front Cover.
