

Alpha Centauri

The year is 2239 and the overburdened Earth groans beneath the weight of 200 billion people. By century's end, the human race will have ceased to exist. The last salvation of humanity is traveling with the crew of the starship *Mother Night*, on a colonizing mission to Alpha Centauri. But a terrorist plague has infiltrated the ship, planting the seeds of failure and extinction in every man and woman on board. And a miraculous relic of an earlier doomed race awaits them at journey's end: a puzzling and impossibly ancient artifact that offers hope beyond all mortal comprehension...or stands as a grim harbinger of the impending death of everything human. From the visionary co-authors of *Iris* and *White Light* comes a remarkable sf adventure that explosively combines danger, suspense, political and sexual intrigue as it moves ingenious concepts and unforgettable characters across the cosmos at light speed.

18 hours ago Alpha Centauri romped home by six lengths Credit: pa sent out Alpha Centauri to win the Coronation Stakes by a stunning six lengths in 23 hours ago Coming of age when winning the G1 Irish 1000 Guineas, TDN Rising Star Alpha Centauri (Ire) (Mastercraftsman {Ire}) progressed again to A new discovery from NASA's Chandra suggests that planets found around Alpha Centauri in the future could potentially be habitable. Neighboring Alpha Centauri stars look friendly to life. The star system is our next-door neighbor in the galaxy. New data shows it might be - 5 min - Uploaded by Fw:ThinkingAlpha Centauri is the closest star system to us at about four light years away but it would take The levels of X-ray radiation streaming from Alpha Centauri A and B two of the three stars in the nearest solar system to our own are Alpha Centauri Bb (? Cen B b) was a proposed exoplanet orbiting the K-type main-sequence star Alpha Centauri B, located 4.37 light-years from Earth in the Centauri system consists of three stars, including Proxima Centauri (sometimes called Centauri C). This star has gained a level of fame Alpha Centauri (IRE) Race Record and Form. 3-y-o (28Feb15 gr f) Mastercraftsman (10.7f) - Alpha Lupi (IRE) (Rahy (9.4f)) Trainer Mrs John Harrington Owner - 41 min - Uploaded by Isaac Arthur A journey out to the stars to colonize Alpha Centauri Visit our sponsor, Brilliant: <https://brilliant> - 1 min - Uploaded by European Southern Observatory (ESO) This video shows a fly-through of the bright double star Alpha Centauri A and B. In the final The neighboring star system Alpha Centauri, which the new Breakthrough Starshot initiative proposes trying to visit, is a good candidate for Alpha Centauri, also called Rigil Kentaurus, triple star, the faintest component of which, Proxima Centauri, is the closest star to the Sun, about 4.2 light-years
