

This # 1 best selling text in the market, used at over 1000 colleges and universities, examines the relationship between biological factors (mostly brain activity) and behavior, and shows students what biology has to do with psychology. Kalat communicates the excitement of biopsychology as a dynamic and empirical field in which fascinating new discoveries are being made constantly. As he captures and engages readers interest, Kalat reveals how aspects of brain activity such as neurotransmission and neuroanatomy relate to real psychological topics such as language and learning, sexual behavior, anxiety, aggressive behavior, depression, and schizophrenia. Now thoroughly revised throughout with the latest research, a new design, a beautiful new art program, new pedagogy and new technology resources, this Seventh Edition maintains the strengths of past editions while adding a whole new look and feel in less than 600 pages. Packaged free with every student copy of the text, this interactive CD-ROM provides study tools, hands-on activities, Web exploration opportunities, chapter-by-chapter quizzing, video clips, and much more. The CD-ROM is integrated at the end of chapters of the text, drawing connections between the CD-ROM and the book. Over 40 minutes of video on the CD-ROM allow students to explore biopsychology concepts in action. Each clip includes an audio introduction by Jim Kalat, relevant figure art from the text, as well as questions that help students understand the connection between the video clips and the art. For the professor, BioPsychLink Presentation CD-ROM for Biopsychology-Advanced PowerPoint presentation software-offers lecture outlines and classroom presentation capability, using art from the text and resources from our exclusive arrangement with CNN videos.

Bloodprint, Sol Shall Rise (The Pike Chronicles) (Volume 1), Expedition to Earth Eleven Science Fiction Stories, How Did We Find Out About Sunshine? (How Did We Find Out Series), B. Smith: Rituals & Celebrations, Reuse of Materials and Byproducts in Construction: Waste Minimization and Recycling (Green Energy and Technology),
