

Introductory Clinical Pharmacology/Lippincotts Photo Atlas of Medication Administration

The Eighth Edition of this core text offers LPN/LVN students a clear, concise introduction to pharmacology, focusing on basic principles and the nurses responsibility in drug administration. Organized by body system, the book examines pharmacologic properties and therapeutic applications of drug classes. Summary Drug Tables present generic and trade drug names, uses, adverse reactions, and usual dosage ranges. This edition has thoroughly updated drug information, pediatric alerts, patient safety alerts, chronic care alerts, and additional material on the nursing process. The enhanced ancillary package includes a free bound-in student CD-ROM, an Instructors Resource CD-ROM, lesson plans, and a test generator. The LiveAdvise online tutoring and course assistance for students, powered by SmarthinkingT, is now available when you adopt this textbook. Visit connection.lww.com/liveadvise for more information on how this service can help your students!
