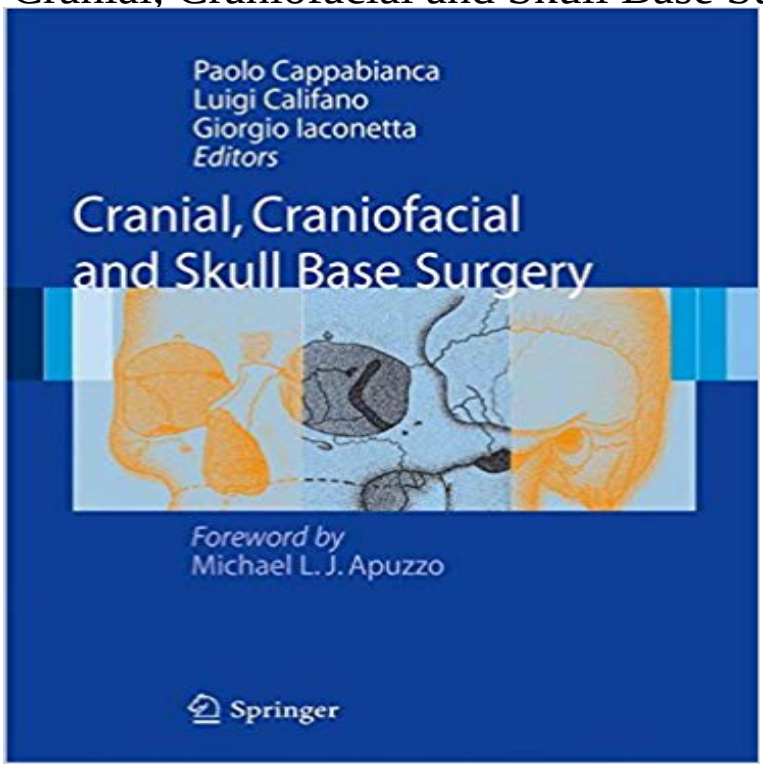
Cranial, Craniofacial and Skull Base Surgery



The Fruits of Reinvention Surgery related to the human head, its compartment and contents has been reinvented over the past 40 years. A number of instruments, most notably the sophisticated medical imaging device and the operating microscope, have principally fueled this evolution. Along the way, endoscopy and sophisticated navigation capabilities have added to the realization of a unique comprehension of normal and abnormal microanatomy permitting corridors and manipu- tions that allow novel strategies for surgery in these highly vital functional areas. Cappabianca, Califano and Iaconetta have created a detailed and fully modern review of methods and strategies related to complex surgery and therapies associated with this robust reinvention. Technical innovations abound! Distinguished practitioners of these unique developments in the history of surgical - terprise present these amazing technical exercises. The catalog of these approaches, inst- mentation, techniques, strategies and manipulations is inspiring and stands as a testimony to the remarkable progress that we have witnessed in recent decades. The presentation in truly modern and represents in many aspects pinnacles of operative achievement. We must ask ourselves, what will be next? Los Angeles, November 2009 Michael L.J. Apuzzo, M.D., Ph.D (hon) Preface We belong to a lucky and happy generation, living during a period of many dramatic, if not revolutionary, technical and technological innovations, such as the digital era, which have changed and improved our routine surgical practice, together with the quality and quantity of life of our patients.

A profusion of surgical approaches to gain access to the anterior and middle cranial fossa and skull base have been described. An attempt has been made toPerforming skull base surgery is extremely demanding because of the many including subcranial resections for tumors involving the craniofacial skeleton andBuy Cranial, Craniofacial and Skull Base Surgery Softcover reprint of the original 1st ed. 2010 by Paolo Cappabianca, Luigi Califano, Giorgio Iaconetta
