

How Smart Is Your Dog?: 30 Fun Science Activities with Your Pet

Your dog will act smarter if you know more about how he thinks. Enter the world of canine senses--how your dog sees, hears, smells, tastes, and touches differently from you, and how a dog's life and aging process differ from yours. You even learn to read your dog's mind--brain function, intelligence, memory, and learning abilities--based on its biological origins. The most fun part is the experiments to test your dog's health, reflexes, vision, and scent; or even trace its behavior back to the wolves that are its ancestors.
