

Relayor

23rd Century San Francisco The Age of Miracles. Man has conquered light and gravity. Proliferation of a new class of explosives has forced the Feds to embrace a fledgling technology called Massing. The physics behind the remarkable phenomena remain elusive because its use is tightly controlled by the developer, Deka Sado, an Asian conglomerate. One thing is clear Massing makes for a formidable attack weapon. Its nature invites speculation as to its limitations, for seemingly, there are none. The SWAT cutters who wield it are heavily screened. There has never been a confrontation between two cutters. Harry Cray, an ex-fighter pilot, has risen rapidly through the ranks of Rone Corporation, a leader in quantum field technologies. The larger-than-life exec is spearheading a leap forward in the evolving face of Planet Earth. Relayor, the most ambitious development project in history, is nearing completion. The sudden arrival of a lone SWAT cutter is shrouded in mystery. Sam Davila is beautiful and beguiling, and there's more to her appearance than meets the eye. James Beach has gone rogue. The ruthless NSA assassin and his sister, Angel, share a taste for beautiful women and a bloodlust they can no longer control. Their worlds are about to collide. The repercussions will shake the foundations of existence. They are joined by a dozen other memorable characters in this epic fantasy thriller set against the backdrop of California's dazzling Bay Area. Among them will be the prodigious physicist/gamer, the spirited protege, the unsinkable redhead and the lusty Italian hit man. You'll meet the German anarchists, the hunter/killer androids, an uninvited castaway, and a hackbox named Stogey. There are the light fields, the gravity domes, the Saturday Night Three-Ways, and of course, there are the cutters wielding a compelling new weapon that is about to change everything. Relayor is a

content-rich adventure, skillfully embroidered with insight, passion and wit, and chock full of magical moments. It seductively blends the technological innovations and historical events of preceeding two centuries into an immersive story that you wont soon forget.
