## CLASSICAL PHILOLOGY VOLUME 6

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 Excerpt: ... Later writers, namely Aetius Amidenus (sixth century) in his lib. xxiii. 1-44, Paulus Aegineta (seventh century) in his *Compendium de Re Medico* v. 1-26, and the pseudo-Dioscurides (seventh century) in the *irtpi lofiokiov*, depend largely upon Philumenus, but in his *Hermes* article Wellmann adopts the view that all these citations come through the medium of the *Swaymyai larpiKal jrpos lovkiavov* of Oribasius, a considerable portion of which has been lost. Wellmann has been able, in editing the text, to use the portions of these later writers which are clearly dependent upon Philumenus. Inasmuch as the accounts in Aetius, Paulus, and pseudo-Dioscurides are frequently fuller than those in Philumenus himself, it may be inferred that the latter has been purposely condensed for use in the compilation. The treatise itself deals with the bites of venomous animals. The author generally presents a short description of each creature, follows this with an account of the symptoms attendant upon the wound which it inflicts, and finally enumerates the antidotes, often naming the physician from whose writings they are taken. The first five sections are occupied with the discussion of wounds inflicted by mad dogs, after which he treats of the various kinds of serpents, the wasp, bee, and spider, lizards, and other poisonous creatures. Indices of words and of writers will increase the value of the text for the ordinary classicist, while for the specialist in this field its interest will be extreme. I have noted the following misprints: p. 18. 20, *yvpov* for *yvpov*; p. 37. 21, *Svjx.\$eiTK* for *8i/x0ts*. Frank E. Robbins The University Op Chicago Neat Epnevelai Avayvbcov. By IAANNH2 N. 2BOPfIN02.
