

StarTram: The New Race to Space

StarTram, a new way to launch people and payloads into space at much lower cost than now possible, will soon radically change the world. How will the world change? Will it be a bright future or a dark future for humanity? We don't know anybody knows. The outcome will depend on our leaders and how we use this new technology. If the nations of the world cooperate, our future will be very bright: clean, low cost power beamed from space satellites to Earth, protection against global warming and threats from asteroids and comets, the mining of near-earth asteroids, real exploration of the Solar System and interstellar space, colonies on the Moon and Mars, space tourism, the discovery of extraterrestrial life forms, mining Helium-3 from the atmosphere of Uranus for return to Earth to fuel fusion reactors, and many other tremendous benefits.

Book Review: StarTram: The New Race to Space (2013) Maglev launch to space was anticipated in the Millennial Project (and by others), but Our Boating Trip from Bordeaux to Paris Catching the Process Fieldbus: An Introduction to Profibus for Process Automation StarTram: The New Race to Space - 19 sec [PDF] StarTram: The New Race to Space Free Books Click Here <http://ebookpdf.site/pdf/?book> StarTram: The New Race To Space By George Maise Charles Pellegrino.
