

The ISLE Reader: Ecocriticism, 1993-2003

This volume gathers nineteen of the most representative and defining essays from the journal *ISLE: Interdisciplinary Studies in Literature and Environment* over the course of its first ten years. Following an introduction that traces the stages of ecocriticism's development, *The ISLE Reader* is organized into three sections, each of which reflects one of the general goals the journal has sought to accomplish. The section titled *Re-evaluations* provides new readings of familiar environmental writers and new environmental perspectives on authors or literary traditions not usually considered from a green perspective. The writings in *Reaching Out to Other Disciplines* promote cross-pollination among various disciplines and methodologies in the environmental arts and humanities. The writings in the final section, *New Theoretical and Practical Paradigms*, are especially significant for the conceptual and methodological terrain they map. *The ISLE Reader* documents the state of research in ecocriticism and related interdisciplinary fields, provides a survey of the field, and points to new methodologies and possibilities for the future.
